

Handheld Heat Press Kit

Built-in timing and an audible alarm minimize operator error and prevent under or over-heating.

- **Consistent splices**
- **Faster operator training**
- **Fewer weld-related callbacks**
- **Reduced downtime**
- **Set the cycle and press start.**

Complete splicing package Includes:

- Heat press tool
- Angle Cutter with replacement blades
- Splice rail clamps
- Cooling tongs
- Carrying Case

***Splice rails are sold separately based on belt width requirements.**

110V OPERATION | PORTABLE | EASY TO USE

This high speed splicing system provides easy and effective welds for thermoplastic reinforced timing and flat belts.
