

# ROLLERGOLD

STRONGER, SMARTER, QUIETER.

ROLLERGOLD AVAILABLE FOR 1.9 AND 1.7 OD STEEL ROLLERS

## APPLICATIONS

### Anywhere sound is an issue

RollerGold is an optimal solution for any environment where excessive conveyor noise needs to be managed, whether for compliance, comfort, or operational effectiveness.

### Distribution Centers

RollerGold helps reduce the ambient noise created by constant package movement and conveyor activity. This improves communication among staff and contributes to a safer working environment.

### Fulfillment Facilities

These high-volume environments benefit greatly from the wear resistance and quiet operation of RollerGold. It supports 24/7 operations without needing frequent replacements.

### Warehouse Operations

General warehouses often deal with heavy packages and high throughput. RollerGold enhances roller life and reduces noise pollution, creating a more efficient workplace.

### Assembly Lines

In manufacturing settings, RollerGold's smooth and quiet operation contributes to a calmer production floor and reduces potential distractions or hearing damage.

## Ideal Customer Profile

- **Warehouse Managers:** Those responsible for maintaining safe and efficient operations will find RollerGold an excellent investment for reducing noise-related complaints and OSHA violations.
- **Facility Engineers and Maintenance Managers:** Professionals who need long-lasting, low-maintenance solutions for high-traffic conveyor systems will benefit from RollerGold's toughness and simplicity.
- **OEMs and Distributors of Conveyor Systems:** Equipment manufacturers and resellers looking to add value to their conveyor offerings can use RollerGold as a performance-boosting accessory.
- **Distribution and Fulfillment Centers:** Facilities processing thousands of packages daily will appreciate RollerGold's impact resistance, noise reduction, and long service life.
