

AP - 600 KIT

Belt Welding System

Full Feature Automatic Heat Press

Efficient Power Usage

Operates on 110 Volt service with a minimal 5 amp draw, ensuring energy efficiency.

Precision Temperature Control

Fully adjustable temperature settings for tailored heating applications.

Dual-Sided Heating

Features heated plattens measuring 4" x 6" on both sides for uniform heat distribution.

Heated Upper and Lower Platen

Integrated Cooling System

Equipped with a built-in air cool down fan, enhancing safety and longevity.

Customizable Timing

Adjustable dwell time and cool-down time for optimal control.

User-Friendly Operation

'Set and forget' control box for hassle-free and consistent performance.

IMPROVE YOUR CONVEYOR SYSTEM TODAY!

Designed for precision, safety, and ease of use.
